

A PRODUCT OF KIESH ENTERPRISES LLP.

HYDROVYN[®]

FUNCTIONAL HYDRATION

About Hydrovyn

01

Infused with water soluble vitamins B3, B5, B6, B12 and C & Zinc

02

Minerals are restored naturally

03

Electrolytes are added in alkaline based water

04

Negative ORP is achieved

Composition

- C** Anti-Oxidant
- B3** Energy Booster
- B5** Helps in Production of Red Blood Cells
- B6** Supports Energy & Fat Metabolism
- B12** Supports Cardiovascular & DNA Production
- Zn** Supports Immune System & Skin Health

An Ultimate Product in Cellular Level Hydration Penetration

Hydrovyn contains water soluble vitamins. They are quickly absorbed into the cells and super-hydrates the cells and boosts metabolism.

Hydrovyn helps the absorption of nutrients and vitamins at the cellular level.

*Composition of vitamins as per RDA (Recommended Dietary Allowance)

Hydrovyn Fulfills the Hydration needs

- Hydrovyn is water that aims to hydrate at a cellular level
- It contains essential vitamins and minerals as per RDA
- Hydrovyn is effective for boosting metabolism, absorption of nutrients, fighting infections, boosting immunity, and replenishing electrolytes
- It is also useful for people in aviation and sports fields

A One Stop Solution for Functional Hydration

Hydrovyn focuses on the following

- **pH:** Potential of Hydrogen
- **ORP:** Oxidation Reduction Potential
- **DO:** Dissolved Oxygen Content
- **Clusters:** Water Molecule Cluster Size
- **Fortification:** Water Soluble Vitamins and Minerals and Electrolytes
- **Future:** Functional "Synchronized" Water with Cohesive Properties

pH: Potential of Hydrogen

- The human body has a natural pH range of 7.36 to 7.44, with acidic pH in cells and stomach
- The body needs to maintain its natural pH level to function properly, and changes in pH levels can lead to serious problems in body organs
- Hydrovyn has a pH level higher than 8.0, which helps lower the body's internal acidity levels and is near to human blood pH range

ORP: Oxidation Reduction Potential

- The human body needs a negative ORP and an alkaline environment to function properly, and alkaline drinking water with negative ORP values can neutralize free radicals and decrease their harmful effects
- The ORP of the human body ranges from -90 mV to -200 mV, Mother's milk being ideal factor with -70
- Hydrovyn is an anti-oxidant alkaline water with negative ORP values, making it an ideal antioxidant

Dissolved Oxygen Content

- Dissolved Oxygen (DO) in water takes up space, so if it's too high, water can't hold other substances, and if it's too low, minerals dissolve affecting water quality.
- Regular water has about 7-8 ppm of DO, and electrolyzing water decreases DO levels to about 4 ppm.
- Hydrovyn water has 4.0 to 4.5mg/l of DO content for redox reactions with bioavailability, and ultrapure water has very little DO and is close to theoretical H₂O with 100% purity.

Water Clusterization

- Water with small clusters of molecules is more easily absorbed by the body, promoting faster absorption of food and drinks and potentially enhancing the effectiveness of medications.
- Hydrovyn uses a vortex-activated water method to create stable clusters of 5-6 molecules, a neutral to weakly alkaline pH, moderate levels of dissolved oxygen and co₂, and strong solvency, metabolism power, and oxidation-reduction quality that resonate with electromagnetic forces

Water Fortification

- Nutritional additives are necessary for the body's metabolic and nutritional processes, including antioxidants. Fortified beverages can help diversify products, increase nutrient intake, and improve public health conditions
- All additives used in food must adhere to Good Manufacturing Practice (GMP) standards and have food-grade quality
- Hydrovyn fortified drinking water contains non-enzymatic vitamins, minerals like magnesium, potassium, sodium, zinc, and vitamin C, B3, B5, B6, B12
- These vitamins and minerals are essential for various bodily functions, such as blood formation, carbohydrate and protein metabolism, and maintaining cardiovascular health

Benefits

01

Essential Vitamins Infused

Many fat soluble vitamins leave residual toxins in the body that causes diseases in the long run. Hence, Hydrovyn infuses water soluble vitamins that are flushed out if consumed in excess.

02

Water Soluble Nutrients

These vitamins when consumed regularly, fortifies the body organs and forms a Defense mechanism that prevents disease entering human body.

03

Alkaline Base

Most of the diseases are caused due to acidic nature of water. By increasing the pH value to above 7.1, the acidic nature of water is nullified and could alleviate recovery of chronic health conditions.

04

Nourish Cognitive Abilities

For people in aviation industry, particularly pilots and aircrew, because of the B vitamins, cognitive abilities of these professionals are nourished.

Comparison Chart

	Hydrovyn	Bisleri Fonzo	Aquafina Vitamin Splash	Kinley Active	Himalayan Orchard Pure	Nestle	Dasani	Fiji Water	Evian
